## **Article 24 – “All children have the right to have clean water”**

Talk through their morning routine and children to count how many times they have used something which involves clean water (e.g. wash dishes, brush teeth, cup of tea, etc.)

### **Task:**

- Using the pictures can the children sort into what uses water and what does not.
- Discuss and agree that you could not do lots of things which keep us clean and healthy without clean water.

### **Reflection:**

- Think about if you did not have clean water, could you brush your teeth? Wash your hair? Wash your clothes? Cook? Wash up your dishes? Drink water? Etc. Talk about how this would feel.
- Agree that it is very important that we have taps in our home and school and access to clean water every day.
